

- 00:20
 - Alright, for this video i'm going to show you how to save a file in your Jupiter notebook on your Python and our file it's one of the same just a little different so first off we're going to start off by opening up a terminal.
- 00:37
 - or command prompt.
- 00:42
 - it's going to look like this.
- 00:45
 - Once you opened up your command prompt let's go ahead and type in Jupiter space lab enter.
- 00:53
 - Alright, so now this thing is attached to this one.
- 01:03
 - like this.
- 01:05
 - be a book create size for you all.
- 01:10
 - Right So for me.
- 01:14
 - you're going to first go to the folder that you want to save this file on for me i'm just going to go to documents.
- 01:26
 - And i'm going to navigate to where I want where I want to begin and save this file.
- 01:34
 - Such as coach to.
- 01:50
 - right here i'm just gonna put it right here.
- 01:53
 - um so.
- 01:56i
 - t's the same thing for Python and are you can see that I have both kernels we're going to go ahead and begin with Python and then i'll move over to our it's the same thing so right here, you can see that the untitled pie.
- 02:14
 - Is in the folder that I want it you're going to right click go to rename and name that what you want i'm going to call it Python.
- 02:24
 - example, make sure that you keep this.pi and or why and be at the end, because that is the format that you want to keep this in so i'm just going to Python example in and press enter.

- 02:38
 - All right, you can see that there's a little gray up here, which means it's not saved I haven't exactly in the file that I want it all you need to do is click the floppy disk and you can see that that Gray.
- 02:54
 - dot went away because it saved i'm from here, all you need to do is just right click.
- 03:03
 - download.
- 03:05
 - It from your downloads I just did a drag and drop ins on my desktop.
- 03:10
 - And that's it you're going to do the same thing with our it's literally the same thing you're going to right click i'm going to call it, our.
- 03:21
 - example enter, you can see the great Dom and hit the floppy disk it's saved i'm going to right click again download.
- 03:31
 - and drag and drop it on my desktop in it's saved if you don't see these at the bottom it's in your downloads so when you right click in anything that says download and you click the button it's in your downloads folder.
- 03:48
 - I can show you so here.
- 03:54
 - i'm gonna go to my downloads folder.
- 03:58
 - And I can see.
- 04:01
 - That it's.
- 04:13
 - Just ensure you.
- 04:16
 - download.
- 04:19
 - download.
- 04:22
 - download there, they are.
- 04:25
 - I just couldn't see them with all the other ones so yep there, right here so they're also in my in my downloads folder.
- 04:32

- And there on my desktop right here, I can see the fiscal for the physical file and that's it that's how you save your whole entire Python script in our script from Jupiter notebook hope this helps.
