- 00:22
  - Alright, so in this video we're going to discuss how to save a Microsoft excel sheets i'm right here, I have my Microsoft excel when you click on this part right here, you can name the file whatever you want so let's just call this example dash excel.
- 00:43
  - Saying.
- 00:46
  - Go ahead and press enter and over here, you can say that we, you can see that we named our file example excel save and.
- 00:55
  - Then all you have to do is go to file it's already saved but let's just double check and let's just do a save as.
- 01:03o
  - ver here and how see how it says copy, so we know that it saved let's just say.
- 01:11
  - let's see let's check out more locations, because I want to.
- 01:16
  - This is the Internet version, for me, I do not pay for this one, so it is on the cloud, in this case i'm going to go ahead and download it and then I can move it wherever I want i'm going to drag and drop it on to.
- 01:30
  - My desktop, and that is it it saved and now it's on my computer.
- 01:36H
  - ope this helps.
